Help fund our new Science Lab!

We're raising money to equip our brand new STEAM lab. With the help of the local council, we've converted a disused space into an amazing STEAM space to inspire our enthusiastic and successful children, but we need help to buy essential equipment and inspiring learning resources. Our target of **£3,000** will be dedicated funding to create a state-of-the-art laboratory.

We need your support to make this vision come true!

Here are some of the things we'll spend the money on:

- £15 buys lab coats for 5 children!
- £30 buys digital scales for experiments!
- £50 buys a set of digital thermometers!
- £100 buys an engineering or electronics kit!
- £175 buys a life size skeleton model!
- £250 buys a fridge to store biology samples!
- £500 buys a 3D printer!

We need to raise £3000!

**Make a donation as small as £10 visit
<http://donatemyschool.com/project/1706>
and register to donate!**

Any contribution would be hugely appreciated and will make a real difference to the lives of London children... you'll even get a special thank-you card from our children to express their gratitude!
